

**STATEMENT OF PURPOSE****RS23518**

Contact lenses are a unique product because they are a medical device. Contact lens manufacturers are now taking advantage of the unique nature of the product and how it is sold by setting price floors. These restrictions prevent retailers from selling contact lenses at market prices and a lack of action on the federal level means Idaho consumers are being harmed. This bill protects those consumers by prohibiting contact lens manufacturers from fixing prices for retailers.

**FISCAL NOTE**

There is no fiscal impact to the General Fund.
